## ■ How to get here

THE  
BERLIN-BRANDENBURG  
STATE INSTITUTE FOR  
SCHOOLS AND MEDIA  
(LISUM)

Venue for Meetings

**The Berlin-Brandenburg State Institute for Schools and Media (LISUM) – your specialist partner for schools, teaching and further training in the Berlin-Brandenburg educational region.**

■ **we**

... are a joint facility for the Federal States of Berlin and Brandenburg, operating on the basis of statutory educational provision in the two States and an official interstate agreement.

... support educational stakeholders in schools and teaching, promoting organisational, staff-focused and quality development, also adult education, by offering events, materials and research.

... identify our Institute and its wide range of services as a key education facility within the Berlin-Brandenburg educational region.

... focus our work on current priorities in educational policy. Along with statutory regulations in both States, our work is also specifically guided by the educational standards agreed by the Standing Conference of the Ministers for Education and Cultural Affairs (KMK); and by school-quality framework guidelines or action plans in both States.

... develop curriculum frameworks and materials for teaching at all school levels and support their implementation in schools.

... take account of up-to-date research findings and specialist debate for informing all areas of our work; we cooperate as partners in projects aimed at the development of schools and teaching.

... coordinate the development of tasks for centralised examinations and standardized comparative studies, including organizing the printing and dispatch of materials.

... provide theory-based and practice-oriented qualifications for senior management in schools, for advisers and staff at further training facilities. LISUM's effective management and infrastructure enable us to plan, organise and deliver programmes with competence.

... offer an extensive range of support on Berlin-Brandenburg's online educational portal – **Bildungsserver Berlin-Brandenburg**

... evaluate a wide range of programmes to ensure and develop quality in schools and teaching, and in school-related facilities within Berlin-Brandenburg's educational region.
